Do I need AI for this?

A short video for the AI Hub home page, under a minute

OBJECTIVE

Before opening AI, ask whether you need it: a simpler tool, a written source or your own judgement often does the job better.

THE IDEA

Every task on the list has the same “Ask AI” button. Sort the tasks to the right tool, and AI ends up in one slot of five: the one where it earns its place.

Audience
All staff, all levels: the hub home page and the “Start here” section.

Format
58.5 seconds, under a minute. 16:9, 1920 × 1080, 30 fps. Captions burned in.

Sound
The voice tells the whole story, so it works for people who read little. Every line is also captioned, so it works with the sound off.

Competence
Problem solving: judging when AI is the right tool, and when it is not.

The video at a glance

1 Intro

2 The reflex

3 A simpler tool

4 Already written down

5 Quicker to do it

6 It needs you

7 AI earns its place

8 The four questions

9 Outro

1	2	3	4	5	6	7	8	9

0s 10s 20s 30s 40s 50s 58.5s

Pairs with two one-pagers. The video ends where *Do I need AI for this?* begins, and that page hands over to *Can I use AI for this?* once AI is the right tool. Place the video next to both on the home page.

Do I need AI for this?

Script: voice-over, on-screen text and captions

	Time	Scene	Voice-over	On-screen text	Caption cues
1	**0:00.0** 0:05.0	**Intro**	**AI is a great tool. But you don't need it for everything.**	Title “Do I need AI for this?”, subtitle “You don't need AI for everything”, logo and “MSF AI Accelerator programme”	AI is a great tool. But you don't need it for everything.
2	**0:05.0** 0:10.5	**The reflex**	**A normal day. Five tasks. And the same reflex every time: open AI.**	List “My tasks today” with five tasks, each with an “Ask AI” button. Side line: “Every task, the same button.”	A normal day. Five tasks. And the same reflex every time: open AI.
3	**0:10.5** 0:15.5	**A simpler tool**	**Add up three invoices? No need for AI. A calculator is faster.**	Card “Add up three invoices”. Slots: “Calculator”, “MSF guideline”, “Just type it”, “You”, “AI”	Add up three invoices? No need for AI. A calculator is faster.
4	**0:15.5** 0:21.0	**Already written down**	**Check the cold chain procedure? MSF already wrote it down. Go to the guideline.**	Card “Check the cold chain procedure”	Check the cold chain procedure? MSF already wrote it down. Go to the guideline.
5	**0:21.0** 0:25.5	**Quicker to do it**	**A two-line reply? Just type it. Asking AI would take longer.**	Card “Reply ‘Yes, see you at 3’”	A two-line reply? Just type it. Asking AI would take longer.
6	**0:25.5** 0:31.0	**It needs you**	**A colleague's evaluation? That needs you: your judgement, your words, your relationship.**	Card “Write a colleague's evaluation”	A colleague's evaluation? That needs you: your judgement, your words, your relationship.
7	**0:31.0** 0:38.5	**AI earns its place**	**A forty-page report to summarise? Now AI earns its place. It saves real time. You still check it.**	Card “Summarise a 40-page report”	A forty-page report to summarise? Now AI earns its place. It saves real time. You still check it.
8	**0:38.5** 0:51.0	**The four questions**	**So, before you open AI, ask yourself four questions. A simpler tool? Already written down? Does it need me? Quicker to do it myself? Four times no? Then AI can help.**	Kicker “Before you open it”, title “Do I need AI for this?”, chips “A simpler tool?”, “Already written down?”, “Does it need me?”, “Quicker to do it myself?”, line “Four times no? Then AI can help.”	So, before you open AI, ask yourself four questions. A simpler tool? Already written down? Does it need me? Quicker to do it myself? Four times no? Then AI can help.
9	**0:51.0** 0:58.5	**Outro**	**Sensitive, about a person, or unsure? Pause and ask. You will find everything else on the MSF AI Hub.**	“Sensitive, about a person, or unsure? Pause and ask.” and the card “AI Hub on SharePoint”	Sensitive, about a person, or unsure? Pause and ask. You will find everything else on the MSF AI Hub.

142 words of voice-over in 58 seconds: about 2.4 words a second, an easy pace with a short pause after every question.

Voice: warm, friendly and lively, like a colleague explaining over coffee. Plain, clearly spoken English for listeners who read little or work in a second language. Questions rise; answers land with a smile.

Do I need AI for this?

Scenes 1 to 3

1 Intro

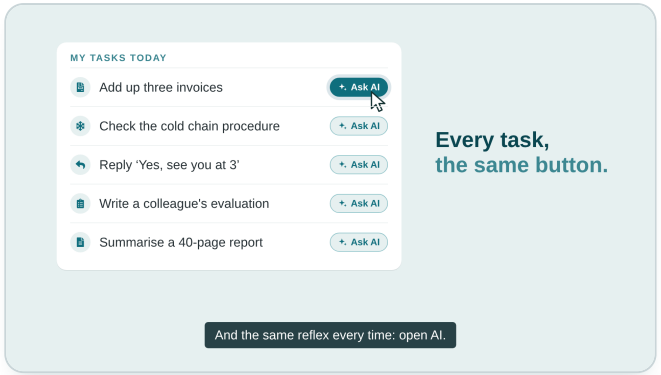

0:00.0 to 0:05.0
5.0 s

“AI is a great tool. But you don't need it for everything.”

House intro, unchanged from the other AI Accelerator videos, held a little longer for the voice-over. Title fades up, subtitle 6 frames later, divider draws left to right, logo and programme name settle last.

Title “Do I need AI for this?”, subtitle “You don't need AI for everything”, logo and “MSF AI Accelerator programme”

Music in: light, warm, a little upbeat. The voice starts once the title has landed.

2 The reflex

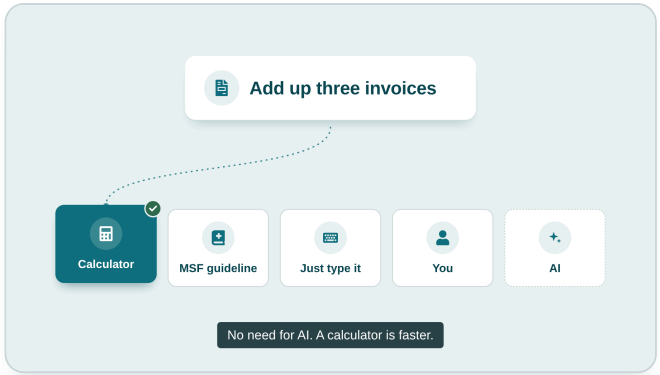

0:05.0 to 0:10.5
5.5 s

“A normal day. Five tasks. And the same reflex every time: open AI.”

The to-do list slides in from the left, one task at a time, in step with “Five tasks”. Every task has the same “Ask AI” button. On “open AI”, the cursor glides to the first button and it pulses once. Freeze for a beat: this is the habit we are about to question.

List “My tasks today” with five tasks, each with an “Ask AI” button. Side line: “Every task, the same button.”

Five soft ticks as the tasks appear; a click as the cursor lands.

3 A simpler tool

0:10.5 to 0:15.5
5.0 s

“Add up three invoices? No need for AI. A calculator is faster.”

The first task lifts out of the list as a card. Five tool slots rise along the bottom. On “A calculator”, the card drops into “Calculator”, which fills teal and shows a tick.

Card “Add up three invoices”. Slots: “Calculator”, “MSF guideline”, “Just type it”, “You”, “AI”

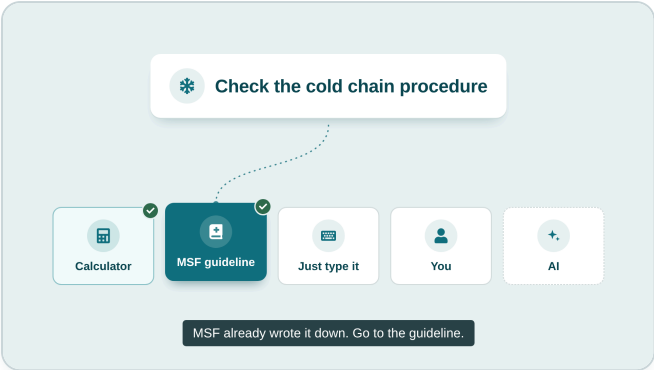

Soft pop as the card lands.

1	2	3	4	5	6	7	8	9

0s 10s 20s 30s 40s 50s 58.5s

Do I need AI for this?

Scenes 4 to 6

4 Already written down

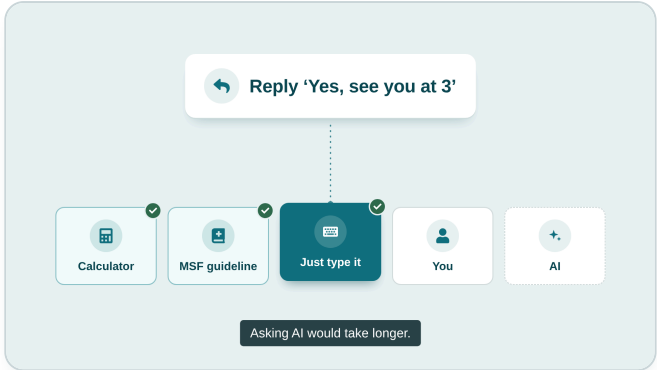

0:15.5 to 0:21.0
5.5 s

“Check the cold chain procedure? MSF already wrote it down. Go to the guideline.”

The next card takes the top position. On “Go to the guideline”, it drops into “MSF guideline”. The calculator slot stays ticked.

Card “Check the cold chain procedure”

Pop, one semitone higher.

5 Quicker to do it

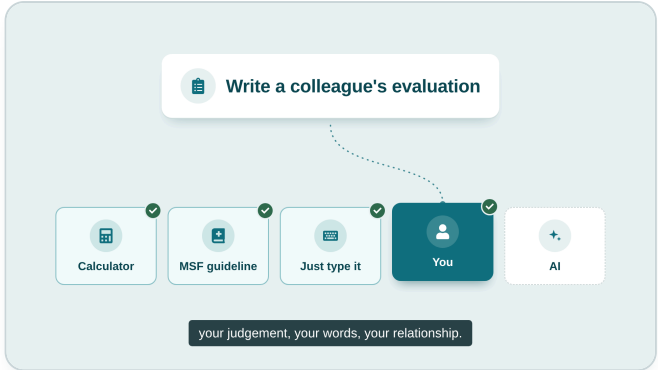

0:21.0 to 0:25.5
4.5 s

“A two-line reply? Just type it. Asking AI would take longer.”

On “Just type it”, the card drops into “Just type it”. Optional: the reply types itself on the card in under a second, to show how quick it is.

Card “Reply ‘Yes, see you at 3’”

Pop, one semitone higher.

6 It needs you

0:25.5 to 0:31.0
5.5 s

“A colleague's evaluation? That needs you: your judgement, your words, your relationship.”

On “That needs you”, the card drops into “You”. This slot gets the strongest emphasis of the four: slightly larger tick, slower settle.

Card “Write a colleague's evaluation”

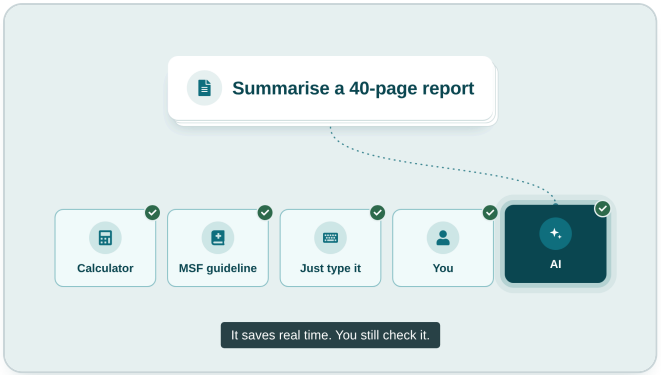

Pop, softer.

1	2	3	4	5	6	7	8	9

0s 10s 20s 30s 40s 50s 58.5s

Do I need AI for this?

Scenes 7 to 9

7 AI earns its place

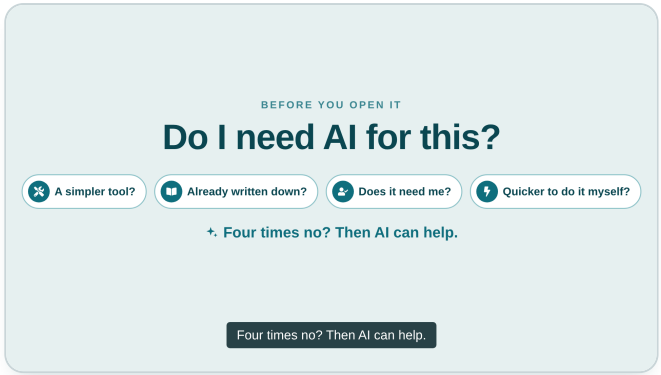

0:31.0 to 0:38.5
7.5 s

“A forty-page report to summarise? Now AI earns its place. It saves real time. You still check it.”

The last card is visibly thicker (a stack of pages). On “Now AI earns its place”, it travels to the “AI” slot, which has stayed quiet until now. The slot lights up with a ring and a tick. Hold on the full row: four ticks, one lit slot.

Card “Summarise a 40-page report”

Warm two-note chime when the AI slot lights.

8 The four questions

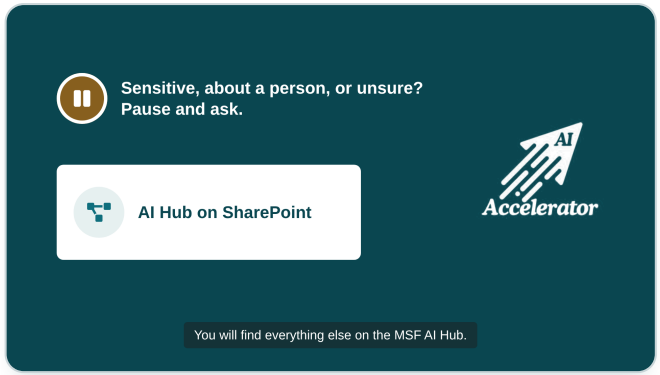

0:38.5 to 0:51.0
12.5 s

“So, before you open AI, ask yourself four questions. A simpler tool? Already written down? Does it need me? Quicker to do it myself? Four times no? Then AI can help.”

The slots slide away. The question builds in large type. Each chip appears exactly as its question is spoken, with a short pause after each. On “Four times no?”, the closing line fades in under the chips with the AI sparkle.

Kicker “Before you open it”, title “Do I need AI for this?”, chips “A simpler tool?”, “Already written down?”, “Does it need me?”, “Quicker to do it myself?”, line “Four times no? Then AI can help.”

Music lifts slightly on the last line, then settles.

9 Outro

0:51.0 to 0:58.5
7.5 s

“Sensitive, about a person, or unsure? Pause and ask. You will find everything else on the MSF AI Hub.”

House outro, unchanged from the other AI Accelerator videos. 18-frame fade through dark teal from the previous scene. Hold the last frame one second after the voice ends.

“Sensitive, about a person, or unsure? Pause and ask.” and the card “AI Hub on SharePoint”

Music resolves and ends on the last frame.

Production notes

Format, house style, motion and acceptance

Format

Size	1920 × 1080, 16:9, 30 fps, 1755 frames
Length	58.5 s including the house intro and outro
Font	Arimo (metric-compatible with Arial), bold for titles and labels
Captions	White Arimo 38 px in a rounded box, bottom centre
Build	Same house intro and outro as the other AI Accelerator videos, unchanged

Colour

- **Dark teal** #0C4A54 — Intro, outro, the AI slot when it lights
- **Teal** #12707E — The slot a task is sorted into
- **Light tint** #EAF3F4 — Background of every content scene
- **Green** #2E6B4F — Ticks: always with the tick icon
- **Amber** #8A6320 — Pause icon in the outro only
- **Caption box** #183336 — At 92% opacity, radius 10 px

Motion

- One move at a time: a card travels, lands, then the next thing happens. Nothing moves while the viewer is reading.
- Cards travel along a gentle curve in about 0.6 s and settle with a small overshoot. No spinning, no bouncing.
- Ticked slots stay ticked: by scene 7 the row shows four ticks and one lit slot. That final row is the message.
- The AI slot is the only dashed slot and stays quiet until scene 7, so its moment is the one bright beat of the video.
- Cuts between content scenes are 12-frame cross-fades. Intro and outro use the house fades.
- Pictures follow the voice: each card lands on the words that name its tool, so people who do not read can still follow.

Deliverables

- MP4, H.264 High profile, yuv420p, +faststart, under 12 MB
- Captions burned in, plus the SRT file supplied with this pack
- A still of scene 7 as the thumbnail (the four ticks and the lit AI slot)
- Optional: a 1080 × 1920 portrait version, re-stacked as in the other house videos

Content rules

- The task list and the “Ask AI” button are generic. They must not imitate the MSF AI Assistant, Copilot or any real product.
- No real names, people, patients or MSF documents on screen. Task wording is exactly as in the script.
- Every line of voice-over is captioned word for word. The video must work with the sound off.
- No meaning carried by colour alone: every tick has an icon, every slot has a word.
- Text stays inside the title-safe area (90 px from each edge). Captions sit 70 px from the bottom.

Before sign-off

- Plays in 58.5 s, with the house intro and outro unchanged.
- Watched once with the sound off: the message still lands.
- Watched once on a phone: every caption is readable.
- Checked against the one-pager: the same four questions, in the same order.
